

Project name	Construction of tourist and catering facilities
Sector	Tourism
Location	Bihać
Location description	The total area of the site is P = 3 875 m ² (cp no. 2149/1, 2149/2, part of cp no. 2418/1 and cp no. 2418/3, cadastral municipality Bihać-grad). The subject locality is in the belt along the bank of the river Una, which is located on the east side of the locality with planned tourist-catering, sports-recreational facilities, and open green spaces. Access to the plot can be realized via the existing road.
Project status	In progress
Project background	The city building land is located next to the "Bakšaiš bridge" along the river Una. The sale is made through a public invitation based on the estimated value by an authorized court expert.
Project description	The realization of the project would contribute not only to the tourist offer of the city but also to the creation of new facilities in the city for the local population. In this way, the contents are oriented towards the river Una on which and with which the city lives. All interventions in the area should have the ultimate goal of man descending to the river through accessible and well-maintained banks with appropriate facilities, because it is precisely such shortcomings that result in man turning his back on the river.

Estimated total value of investment in EUR	-
Form of cooperation with a partner	The project requires cooperation with: the Government of Una-Sana Canton, the Government of the Federation of BiH, the Institutions of BiH, as well as other relevant organizations and international financial institutions. Certainly, cooperation with the private-business sector is needed, especially if one of the modalities is a public-private partnership.
